## BRANDY

Cognac is dominated by large companies who buy grapes from other farmers. If these farmers don't see the end product, can they really care as much about the grapes they sell? there is a small up of 'grower' makers who grow their own grapes with care and attention to make their own brandy.

# WINE

For Glorietta wine is a passion and a pleasure. She loves great quality ingredients in her food, and it doesn't stop at wine.

She loves winemakers who put a lot of emphasis on the vineyard, and the best winemakers know their vineyards back to front; they are more proactive than reactive and they don't need to throw in lots of pesticides and fungicides as they have already anticipated the needs of their vines. If they handle the grapes the right way, they won't need to add as much preservatives to stop the wine turning to vinegar. Because sometimes the best wines have the least intervention. This can be an extremely difficult technique to master but when done right the result is beautiful.

Glorietta celebrates both classic and natural wines and the art of wine making in general. She's brought together a list of the wines she loves; some natural, some classically made; most of them from winemakers who are more conscious about the techniques they use in the vineyard and winery.

She loves exploring different varieties and always loves nudging her guests to try something new.

To make life easier, the list is organised from lightest to heaviest, both in grape variety and in each section.

## ORANGE AND SKIN CONTACT

Red wine comes from the pigment of the red grape skins when left in the fermentation process. By doing the same with white grapes you can get a fantastic orange or skin contact wine.
